

AURION // MEDICAL TRIAGE REPORT

Report Generated: 2025-12-06 12:14

Session Date: 2025-12-06

Time (HST): 12:07 PM - 12:07 PM

Patient: John

CHW Name: Akhil

CLINICAL ASSESSMENT SUMMARY

The patient, John, reports experiencing severe chest pain. The Community Health Worker (CHW), Akhil, suggests immediate contact with emergency services. The conversation indicates potential health care concerns but lacks further detailed exploration of other social determinants.

BIOMETRIC ANALYSIS

Stress Score: 2.6/10 (>6 indicates high vocal tension)

Energy Score: 13.3/10 (<4 indicates lethargy/flat affect)

Peak Volume: 100 dB

DETECTED ISSUES & GUIDED SOLUTIONS

ISSUE CATEGORY: Health Care, Masked Distress

Patient Statement: "I'm not good, I'm not doing good today Mr. Akhil. I have a very bad chest pain."

Recommended Action: Thank you for reaching out about your chest pain. It's important to address this symptom seriously, as it can have several causes, some of which might require urgent medical attention. Here are a few best-practice recommendations you can convey to the patient:

- **Immediate Attention**:** Advise the patient that they should seek immediate medical care, especially if the chest pain is severe, persists for more than a few minutes, or is accompanied by symptoms like shortness of breath, sweating, nausea, or pain that spreads to other parts of the body, such as the arms or jaw.
- **Emergency Services**:** If the chest pain is intense and is suspected to be related to heart issues, suggest that the patient consider calling emergency services or going to the nearest emergency department.
- **Rest and Calm**:** Encourage the patient to sit down and try to remain calm while they wait for medical assistance. Stress and exertion can sometimes exacerbate chest pain.
- **Medical History**:** If possible, ask the patient if they have any known heart conditions, recent injuries, or other relevant medical history that could be shared with healthcare providers.
- **Follow-Up**:** Suggest that the patient follow up with their healthcare provider after any immediate concerns are addressed, to discuss their symptoms further and arrange for any necessary tests or referrals.

Please note: This advice is generated by an AI model, and it is crucial for the patient to consult with a healthcare
