Report Generated: 2025-12-09 10:42

**Session Date:** 2025-12-09

**Time (HST):** 10:41 AM - 10:41 AM

**Patient:** Mr. Locke

**CHW Name:** Unknown

## CLINICAL ASSESSMENT SUMMARY

The patient, Mr. Locke, reports experiencing a very bad headache. He attributes this to not eating anything the previous day. The conversation identifies a potential issue related to food insecurity, which could fall under 'Economic Stability'. The patient's low audio energy score suggests lethargy, possibly indicating his verbal cues do not align with his actual state.

## COMMUNICATION QUALITY ANALYSIS

Open-Ended Questions: 0

Closed-Ended Questions: 1

Open-Ended Ratio: 0.0%

**Quality Assessment: NEEDS IMPROVEMENT. High reliance on Yes/No questions limits information gathering.**

## DETECTED ISSUES & GUIDED SOLUTIONS

### ISSUE CATEGORY: Masked Distress

*Patient Statement: "Hi, I'm doing all right. I just have a very bad headache."*

Recommended Action: RECOMMENDATION:

Headaches can be uncomfortable and disruptive. Here are some basic tips that may help relieve your symptoms:

1. Stay Hydrated: Make sure you are drinking plenty of water throughout the day as dehydration can often cause headaches.
2. Rest: Ensure you get enough rest and try to relax in a quiet, dark room if possible.
3. Over-the-Counter Pain Relievers: Consider using over-the-counter medications like ibuprofen or acetaminophen for temporary relief. Be sure to follow the instructions on the medication packaging.
4. Warm or Cold Compress: Applying a warm or cold compress to your head or neck can provide relief. Choose whichever feels more soothing for you.
5. Avoid Triggers: If you know certain foods, lights, or activities trigger your headaches, try to avoid them.
6. Consider Your Environment: Ensure your work or home environment isn't too bright or noisy, as this can exacerbate headaches.

## AURION // MEDICAL TRIAGE REPORT

If the headache persists beyond a day or is very severe, it would be best to seek medical advice from a healthcare professional to receive a personalized diagnosis and treatment plan.

### ISSUE CATEGORY: Economic Stability, Masked Distress

*Patient Statement: "I didn't eat anything yesterday. You see, so."*

Recommended Action: Thank you for reaching out about your concern. Here are some general recommendations and suggestions that you might find helpful:

1. **\*\*Eat Small, Frequent Meals\*\***: If you're having trouble eating regular meals, try having smaller, more frequent snacks that are easy to digest and appealing to you.
2. **\*\*Stay Hydrated\*\***: Make sure you are drinking enough fluids throughout the day. Water, herbal teas, or broths can help keep you hydrated.
3. **\*\*Nutrient-rich Foods\*\***: Include foods that are high in nutrients like fruits, vegetables, whole grains, and protein sources such as lean meats, eggs, beans, or tofu.
4. **\*\*Set a Routine\*\***: Try to establish a regular eating schedule. This can help your body anticipate meals and improve appetite over time.
5. **\*\*Chew Thoroughly and Eat Slowly\*\***: Eating slowly and chewing food thoroughly can aid digestion and make it easier for your body to process the food.
6. **\*\*Seek Professional Help\*\***: If your lack of appetite persists, it is important to seek advice from a healthcare professional like a doctor or a registered dietitian. They can provide personalized advice based on your specific health needs.
7. **\*\*Monitor for Symptoms\*\***: Be aware of any other accompanying symptoms such as nausea, weight loss, or fatigue, and inform a healthcare provider.

Please note that these suggestions are general and may not apply to everyone. It is always best to consult with a healthcare professional for advice tailored to your specific circumstances. The information provided here is generated by an AI model and should not replace professional medical consultation.
