

# AURION // MEDICAL TRIAGE REPORT

Report Generated: 2025-12-06 12:11

**Session Date:** 2025-12-06

**Time (HST):** 12:07 PM - 12:07 PM

**Patient:** John

**CHW Name:** Akhil

## CLINICAL ASSESSMENT SUMMARY

The patient, John, reports experiencing severe chest pain. The Community Health Worker (CHW), Akhil, suggests immediate contact with emergency services. The conversation indicates potential health care concerns but lacks further detailed exploration of other social determinants.

## BIOMETRIC ANALYSIS

Stress Score: 2.6/10 (>6 indicates high vocal tension)

Energy Score: 13.3/10 (<4 indicates lethargy/flat affect)

Peak Volume: 100 dB

## DETECTED ISSUES & GUIDED SOLUTIONS

### ISSUE CATEGORY: Health Care, Masked Distress

*Patient Statement: "I'm not good, I'm not doing good today Mr. Akhil. I have a very bad chest pain."*

**Recommended Action:** Thank you for sharing this information. Please note that the recommendation I'm providing is generated by an AI model and is meant for general informational purposes only. It's important to seek professional medical advice for a comprehensive assessment and appropriate treatment.

For a complaint of severe chest pain, it is crucial to take it seriously as it could indicate a serious condition, such as a heart attack. Here are some best-practice recommendations you can suggest to the patient:

1. **\*\*Encourage Immediate Medical Attention\*\*:** Advise the patient to seek immediate medical attention. If the pain is severe or accompanied by symptoms like shortness of breath, sweating, or pain radiating to the arm or jaw, it's better to call emergency services as these could be signs of a heart attack.
2. **\*\*Rest and Avoid Physical Activities\*\*:** Until they receive medical advice, they should rest and avoid any physical activities that might exacerbate the pain.
3. **\*\*Note Symptoms and Triggers\*\*:** Keep track of when the chest pain occurs (e.g., during rest, physical activity, or stress) and any additional symptoms that accompany the pain. This information can be helpful for healthcare providers.
4. **\*\*Avoid Potential Triggers\*\*:** If possible, they should try to avoid known triggers such as smoking, caffeine intake, or stress.

## AURION // MEDICAL TRIAGE REPORT

Remember, this guidance is from an AI model and should not replace professional medical consultations. Advise the patient to contact a healthcare provider as soon as possible.
